DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14 and 18-30, drawn to method, classified in class 438, subclass 510.
- II. Claims 15-17, drawn to apparatus, classified in class 134, subclass 1+The inventions are distinct, each from the other because of the following reasons:

Inventions *process for cleaning silicon wafers* and *apparatus for cleaning silicon wafers* are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the cleaning steps equate just as easily to a manual process done by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Vincent Greene on 3/28/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2812

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
